

Thermal Angel®

Blood and IV Fluid Infusion Warmer

Catalog

The Thermal Angel is an in-line, battery-powered disposable, lightweight and completely portable blood and IV fluid infusion warming device, capable of intravenous application and irrigation warming.

The Thermal Angel is the immediate solution for a healthcare professional seeking to help combat the numerous negative and ultimately deadly effects of hypothermia that are caused by severe trauma situations such as blood loss, exposure, burns and fluid-induced hypothermia.

Thermal Angel

Catalog #: TA-200

Price Each: Call (877) 354-0286

- Lightweight (9 oz), in-line, disposable, portable battery-powered blood and IV fluid infusion warmer
- Will strive to achieve 38°C (100.4°F) ±3°C at a flow rate of 2 to 150 ml/min given a fluid input temperature of 20°C (68°F) with a fully charged TA-BCE Battery
- Quick setup within 30 seconds, warms in approximately 45 seconds
- Placed at or near the infusion site for minimal heat loss through tubing
- The unit uses standard luer fittings and will accept all standard IV line sets
- Heaters adjust automatically in response to changes in flow rate
- Disposable (single patient use), no cartridges or cleaning
- Serves as a standard of care in the pre-hospital, hospital and outpatient markets
- Single point of heated infusion from first contact through the entire continuum of care
- Meets AABB standards for warming devices for blood components
