

# Thermal Angel®

Blood and IV Fluid Infusion Warmer

## **Combat Casualty Evacuation Care (CASEVAC) Citations**

---

### **The Prehospital Trauma Life Support Manual, 5<sup>th</sup> Edition 2003:**

#### Ch. 17: Military Medicine

“The potential for casualties to develop hypothermia and secondary coagulopathy makes adequate warming an important function in preparation for and during CASEVAC. Concomitant use of the Thermal Angel device and the Rescue Wrap, have been employed in combat operations in both fixed-wing and rotary aircraft. This combination has proven able to increase a casualty’s temperature in ambient temperatures below freezing”.

### **Journal of Special Operations Medicine (JSOM), Fall 2003:**

Tactical Combat Casualty Care – 2003 by Stephen D. Giebner, MD, MPH, Chairman of Committee on Tactical Combat Casualty Care (TCCC)

“The serious potential for casualties to develop hypothermia and secondary coagulopathy received special emphasis during CASEVAC. Concomitant use of the Thermal Angel device, and the Rescue Wrap, and gel heaters was endorsed in recognition of the successful use of this combination in combat operations”.
