

Thermal Angel®

Blood and IV Fluid Infusion Warmer

Testimonial

Keywords: EMS, Hospital, ICU, Military

I never used the Thermal Angel in my civilian practice in the ICU setting. It wasn't until being deployed with the Army to my current duty station in Afghanistan that I was introduced to it. And I have to say I really like what it does to complement the warming measures we use for our trauma patients.

I think that the environment that I work in is difficult on equipment - lots of sand and dust! So, I want to ensure that I have plenty of backup equipment to fall back on. Your catalog is a great help to me in getting additional supplies! Thanks again - and I look forward to working with your company in the future!
