

# Thermal Angel<sup>®</sup>

**Blood and IV Fluid Infusion Warmer**

## ***Testimonial***

***Keywords: EMS, Fire Department, Prehospital, Rescue***

---

I had the opportunity to use your product last week here in South-central Alaska. A car ran off the road into a local river, broke through the ice and completely submerged both passengers. We used the Thermal Angel for aggressive fluid resuscitation on both severely hypothermic patients with great success. I would highly recommend your product to any fire or rescue service operating in cold conditions.
